

USB 2.0 to SVGA adapter

Description

This USB 2.0 to SVGA adapter by Delock enables the connection of additional VGA monitors, LCD displays or projectors to your PC or Notebook, without use of a second VGA card. Thus you can mirror as well as extend your display and work on several displays at the same time. In order to connect several monitors, etc. to a PC, you simply need an additional SVGA adapter for each display.
